2 MODELS.

- SPRAY GEL TWIN C
- SPRAY GEL TWIN F

SPRAY GEL TWIN C

Dual use for hot spraying: more productivity.

Two dispensers deliver high productivity.

Spray Gel Twin C is equipped with two separate circuits and two guns with red suction hoses for dispensing gelatine.

This allows different-flavoured gelatines to be used and dispensed simultaneously.

Sealed boiler with rapid heating for greater efficiency and lower energy consumption.

The product is drawn directly from the containers placed in the lower compartment and sent to sprayers without coming into contact with the air, thus guaranteeing maximum hygiene.

The entirely stainless steel body allows for quick and easy cleaning.

SPRAY GEL TWIN F

Infusions and gelatines come together for the maximum possible efficacy and efficiency.

Spray Gel Twin F sprays at both hot and cold temperatures.

The gelatine is distributed through the red hose attached to the gun on the right, while the infusions or other liquids are distributed via the gun attached to the blue suction hose on the left.

The product is drawn directly from the containers placed in the lower compartment and sent to sprayers without coming into contact with the air, thus guaranteeing maximum hygiene.

Sealed boiler with rapid heating for greater efficiency and lower energy consumption.

The entirely stainless steel body allows for quick and easy cleaning.
